

PRODUCT SPOTLIGHT

Velvet[®]

Water enhancer

- For clearer, more comfortable water
- Nourishes skin and hair
- Reduces skin and eye irritation
- Protects metal surfaces and equipment, including the heater
- Storage and transport friendly

Velvet®

Water enhancer

BioGuard® SPA Velvet is designed to provide many of the same benefits to spa water as BioGuard Optimiser® does for pool water.

Benefits:

- For clearer, more comfortable water
- Nourishes skin and hair
- Reduces skin and eye irritation
- Improves chemical effectiveness
- Protects metal surfaces and equipment, including the heater
- Storage and transport friendly

Features:

- 90% w/w boric acid
- Built-in corrosion inhibitors and fragrance
- Reduces dissolved carbon dioxide in water
- Increases mineral solubilities
- Compatible with all types of sanitiser, including biguanide
- Compatible with all spas and hot tub surfaces
- pH of 1 % solution = 4.4

Product application:

1. CAUTION: Velvet should only be added to a spa or hot tub after the water has been properly balanced.
2. Ensure pH is in the range 7.4 - 7.6.
3. Add an initial dose of 200 grams of Velvet per 1,000 litres by broadcasting the product over the water with the pump running.
4. As weekly maintenance, add 30 grams of Velvet per 1,000 litres with the pump running.
