

POISON: KEEP OUT OF REACH OF CHILDREN

Primary Constituent: Hydrochloric Acid 25%

Directions

Hydrochloric Acid also known as Muriatic Acid or Spirits of Salts, can be used to reduce the pH and total alkalinity of the swimming pool.

Dosage

Use the following chart to determine the required quantity of hydrochloric acid to add.

Present pH	To lower to desired pH			
	7.0	7.5	8.0	8.5
7.5	8	0	0	0
8.0	12	3	0	0
8.5	14	7	3	0
9.0	19	11	8	5
9.5	33	27	23	20
10.0	59	51	47	44

Millilitres of Hydrochloric Acid needed per 1,000L (220 Gals)

pool master

Hydrochloric Acid

Nett Contents: 20 Litres

FOR USE IN SPAS, HOT TUBS & SWIMMING POOLS ONLY
UN No 1789 PG 11
